**Bio Drain™**

**DIRECTIONS FOR USE**

InVade™ Bio Drain™ contains premium, natural, scum-eating, odor eliminating microbes, and citrus oil in a thickened formula to coat the sides of drains. Moisten drain with warm water (1-2 gal) before treatment if not used regularly and apply at low drain usage times of the day. Apply 4 oz to each drain around the edges to coat the sides. Reapply every other day for first week and then weekly for ongoing maintenance. InVade Bio Drain can also be used to treat 'sugar snake' in soda fountain drip trays. Apply about 1 oz to each drain weekly. For mopping applications, apply 4 oz per standard mop bucket. For other surface cleaning, such as dumpsters, trash chutes and urinals, use 4-8 oz per gallon of water and apply with a sprayer. To foam the product, place 4-8 oz in a gallon

of water and add 2-4 oz of foaming agent and apply using a foamer. InVade Bio Drain may also be used in power sprayer systems or hose end sprayers at a rate of about ½ to 2 oz per gallon of water. This product will not be harmed if blended with an IGR and/or pyrethroid or non-repellent insecticide. The applicable pesticide label must be followed in this instance.

**Precautions:** Keep out of reach of children. If more than an incidental amount is swallowed, seek medical attention immediately. Give one glass of water and do not induce vomiting. Wash hands well after use. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for any persistent irritation. Store in a closed, appropriately labeled container between 35 and 95 °F.
